

CSE508 Information Retrieval Winter 2024 Assignment-3 Report

AKASH KUMAR

MT23012

Date of Submission:-23-04-2024

1. Data Preprocessing:

In the we preprocess the data on the two column that name is Title and summary and preprocess it. the

```
from bs4 import BeautifulSoup

def preprocess_text(text):
    # Remove HTML tags
    text = BeautifulSoup(text, "html.parser").get_text()

    # Convert to lowercase
    text = text.lower()
    |
    return text

# Apply text preprocessing to the 'Summary' column in review_df
review_df['Text'] = review_df['Text'].apply(preprocess_text)

# Print the preprocessed summaries
print(review_df['Text'])
```

o/p

```
text = BeautifulSoup(text, "html.parser").get_text()

```

2. Methodology:

GPT-2 Setup:

Start by initializing the GPT-2 Tokenizer and Model from Hugging Face, leveraging their GPT2Tokenizer and GPT2LMHeadModel.

Data Preparation:

Split the dataset into 75% for training and 25% for testing. Develop a custom PyTorch dataset class to streamline data preprocessing, including tokenization and padding.

Model Fine-Tuning:

Fine-tune the pretrained GPT-2 model on the review dataset to generate summaries. Experiment with hyperparameters such as learning rate, batch size, and number of epochs for optimal performance.

Key Parameters:

For this setup, utilize the following parameters: epoch = 8, learning rate = $5e-5$, batch size = 32, sample size = 20000, max length = 180. The model is trained on a dataset consisting of 20,000 data points, with training time averaging around 2 hours.

Query Processing:

Implement a function to process queries and present the output in the specified format.

```
tokenizer = AutoTokenizer.from_pretrained("gpt2")
model = AutoModelWithLMHead.from_pretrained("gpt2")
```

+ Code

+ Markdown

```
model = model.to(device)
optimizer = optim.AdamW(model.parameters(), lr=5e-5)
```

3. Evaluation:

- **ROUGE Score Assessment:**

Post-training, evaluate the model's effectiveness by computing ROUGE scores on the test set. Measure the ROUGE scores for each predicted summary against the corresponding actual summary.

```

I've been looking into finding more high protein snacks with low carbs and calories and
Enter your summary prompt (press Enter for default ' TL;DR '):
Great Tasting and Satisfying!

Generated Summary: Great for high protein/low sodium dieters
ROUGE-1: Precision: 0.17, Recall: 0.25, F1-Score: 0.20
ROUGE-2: Precision: 0.00, Recall: 0.00, F1-Score: 0.00
ROUGE-L: Precision: 0.17, Recall: 0.25, F1-Score: 0.20

I love the taste of these sticks and their high protein content, no issues there. My problem with this product is that it creates, for me
Enter your summary prompt (press Enter for default ' TL;DR '):
Great tasting, but may cause embarrassing side effects..

Generated Summary: Extremely painful side effects
ROUGE-1: Precision: 0.50, Recall: 0.25, F1-Score: 0.33
ROUGE-2: Precision: 0.33, Recall: 0.14, F1-Score: 0.20
ROUGE-L: Precision: 0.50, Recall: 0.25, F1-Score: 0.33

Enter your review (type 'exit' to quit):

```

- **Analyzing Results:**

Quantitative Assessment: Look at ROUGE scores to see how well the model summarized the text.

Qualitative Evaluation: Check a few generated summaries to see if they make sense and sound good.

Hyperparameter Influence: How different settings affect how well the model works.

Comparison with Other Methods: See how the model's ROUGE scores stack up against more straightforward methods.

Conclusion:

Sum up what you found, what the model did well, and where it could improve.

Suggest areas where the model could be improved, or more research could be done.

Tried this brand for the first time. We are used to giving our dog Beneful. But she started to itch a lot and we didn't want to go to the vet at this point. So after reading reviews of this product we got it, and our dog LOVES it!!!!!! What a success. It doesn't leave her hungry and wanting more. Awesome product!!!!
Enter your summary prompt (press Enter for default ' TL;DR '):
My Dog loves this

2024-04-22 15:07:01.949484: E external/local_xla/xla/stream_executor/cuda/cuda_dnn.cc:9261] Unable to register cuDNN factory: Attempting to register factory for plugin cuDNN when one has already been registered

Fast individual dessert that is worth a try. It's more like a yummy gooey chocolate cake than a brownie, good nonetheless. It quickly cures a hankering for something sweet and worth having on hand. THREE minutes to prepare and make then just wait for it to cool before you can indulge.

Psst...if you can live without the topping, using your favorite BOX cake mix:

In a Microwaveable dish or Mug take 6 measured Tablespoons of cake mix + 5 Tablespoons of Water. THEN Mix well. Microwave for 55 seconds on HIGH. Check for doneness at center, I not quite done zap it again for 10 second intervals until done. Then enjoy with a spoon :)
Enter your summary prompt (press Enter for default ' TL;DR '):
Quick Individual Dessert

Generated Summary: Iced, yummy and addictive.

Enter your review (type 'exit' to quit):
The only difference between this and easy mac... the noodles and the green speckles they call broccoli.It filled me up, but didnt really satisfy... it made me feel like I was 10 again.
Enter your summary prompt (press Enter for default ' TL;DR '):
I was let down

Generated Summary: easy mac..

Enter your review (type 'exit' to quit):
My cats have been happily eating Felidae Platinum for more than two years. I just got a new bag and the shape of the food is different. They tried the new food when I first put it in their bowls and now the bowls sit full and the kitties will not touch the food. I've noticed similar reviews related to formula changes in the past. Unfortunately, I now need to find a new food that my cats will eat.
Enter your summary prompt (press Enter for default ' TL;DR '):
My Cats Are Not Fans of the New Food

Generated Summary: Not the same
